

CLIMATE CHANGE WORKING GROUP (HPBC)

Meeting: Thursday, 27 May 2021 at 6.30 pm in Virtual

Present: Councillor A McKeown (Chair)

Councillors T Ashton, A Barrow, J Collins, C Farrell, L Grooby, M Hall, D Lomax, G Oakley, K Thomson, E Thrane and J Todd

Apologies for absence were received from Councillors I Huddleston, T Kemp and S Thomson

45 MINUTES OF THE PREVIOUS MEETING (Agenda Item 3)

RESOLVED:

That the minutes of the meeting held on 22 April 2021 be approved as a correct record.

46 ACTIONS SINCE THE LAST MEETING - VERBAL (Agenda Item 4)

There had been a meeting of the bio-diversity group. The details of training events to be held by the LGA / EM Councils in the next few months would be circulated.

47 UPDATE ON DRAFT ACTION PLAN - VERBAL (Agenda Item 5)

The final draft of the action plan was to be submitted to members for approval, and would be circulated to this group.

Low carbon advertising – the working group were asked if they wished to develop a policy around low carbon advertising in areas within the council control and council owned bus shelters, and to add into planning policy around hoardings. Whilst members were generally supportive of the proposal in principle, some concern was expressed regarding the ability to enforce the policy and whether there were more pressing priorities.

48 THEME - WASTE (Agenda Item 6)

a. The Circular Economy

Amanda Reid, Waste Operations Manager for Savills, made a presentation to the Working Group around the circular economy and the benefits of local authority initiatives. Matters reported on included why resources should be used in a more circular way to help provide a solution to the increase in carbon emissions by making the goods of today the resources of tomorrow. The three principles of the circular economy are: Design not waste and

pollution, keep products and materials in use and regenerate natural systems. Examples of circular business models which maximised customer benefit and value retention in products included lease, repair / maintenance, reconditioning which can all provide a longer life. Council led initiatives could include a plastic free strategy, linked to local businesses and the adoption of a : circular procurement policy. Community initiatives across the UK include: community bike repair, food surplus redistribution and surplus, re-use hubs and shops, library things, working with social enterprises to create volunteering and skill sharing partnerships and high street hubs. Reference was also made to initiatives undertaken by Savills and the creation of the Circular Economy Club.

Members made reference to similar initiatives locally, and particular reference was made to the possibility of empty town centre shops being used to create a library of things, for example, which it was agreed would be referred to the Regeneration Team for consideration. It was commented that community groups are often constrained due to funding and a lack of affordable, accessible space from which to operate.

- b. Overview of future Government direction in regards to waste management and service provision

Nicola Kemp, Head of Service Commissioning for HPBC and SMDC made a presentation to members which provided an overview of future Government direction in regards to waste management and service provision (a copy of the presentation is attached). The presentation gave an introduction to the Resources & Waste Strategy (2018) and the key changes it proposed, including reforming the UK packaging producer responsibility system (EPR), Plastic Packaging Tax, the introduction of a Deposit Return Scheme (DRS) in England, Wales and Northern Ireland and establishing consistency in recycling collections in England. Consultation was on-going with a suggested implementation timeline of 2023. The implications for HPBC were set out and would mean the collection services for business and residents will need to change. It was noted that funding arrangements for waste management is to change, and local authorities should not be worse off as a result of these changes in services. In the meantime, work was on-going around greening the fleet in conjunction with AES.

Regarding food waste, members were advised that if food waste was processed separately to garden waste via an anerobic composter then as well as compost, another by product of the process can be used as an energy source. If food waste is processed together with garden waste then the energy source is lost.

Due to a change in the law, the producers of electrical equipment are now required to enable the sale of parts to repair items, rather than replace.

Regarding Waterswallows, it was confirmed that waste items were recycled and stripped down to their component parts. There are no re-use facilities currently, although it was reported that there is currently a planning application with DCC for the creation of such a facility at Waterswallows.

Ways in which further education and information could be provided around recycling were discussed, and reference was made to the stickers on the brown bins and information provided on the website and through social media. Through the consistency in recycling initiative it was hoped that producers would be required to provide clearer labelling on packaging.

- c. Actions arising from the presentations
 - Refer the issue around short term lets for community use as part of the circular economy
 - Circulate information around the planning application at Waterswallows <https://planning.derbyshire.gov.uk/Planning/Display/CW1/0521/4>
 - Policy to reduce paper / plastic use by the council

49 CONSISTENCY IN HOUSEHOLD AND BUSINESS RECYCLING IN ENGLAND CONSULTATION (COUNCILLOR TODD)
(Agenda Item 7)

This had been dealt with under the previous item.

50 DATE OF NEXT MEETING - 8 JULY 2021, THEME, ENERGY SUPPLY
(Agenda Item 8)

RESOLVED:

That the next meeting be held on 8 July at 6.30 p,m, via Teams.

The meeting concluded at 8.08 pm

CHAIRMAN
