23rd April 2021

To the Managing Director or person responsible for Health and Safety.

### **HSE COVID-19 SPOT CHECKS**

HSE is currently working with Cheshire East Council to carry out spot checks on businesses to check they have COVID-secure measures in place to manage the risk from coronavirus.

*We do this by phoning and visiting businesses to discuss the measures they've put in place and to check they are in accordance with the current Government guidelines and arranging inspections where necessary. We also provide advice, when needed, on how to manage the risks to protect staff, customers and visitors.*

Please note, for HSE to reach as many businesses as possible, and to support the core work of our inspectors, we are working with trained and approved partners to deliver the spot check phone calls and visits.

### **WHAT YOU SHOULD DO NOW**

By law, employers have a duty to protect staff, customers, visitors and others from harm. This includes taking steps to manage risk from coronavirus.

**Ensure your risk assessment is up-to-date and you have put in place the measures identified to manage the risk from coronavirus in your business. You should talk to your employees about your COVID-secure measures and, where applicable, involve safety representatives and Trade Unions.**

For guidance on making your business Covid-secure, and information on spot checks and inspections, visit our website at [www.hse.gov.uk/campaigns/spot-inspections.htm](http://www.hse.gov.uk/campaigns/spot-inspections.htm).

Yours sincerely

Angela Storey

Director of Operations
